Functions	Mulch, collect and rear discharge

Long Description

Precise and agile, the EGO Power+ LM1701E is perfect for small and medium sized level gardens, and can cut up to 400sqm in a single charge. This push mower gives you the control you need to work in tighter spaces. With its 42cm cutting capacity and large 55L rear collection bag, you're able to finish the job whilst collecting your clippings – or if you prefer, you can discharge or mulch (ABP1700 mulching kit available to purchase separately) giving you even more flexibility. Developed with you in mind, our ARC Lithium™ 56V battery delivers the industry's highest energy capacity in a portable handheld battery. This lawn mower is equipped with our 2.5AH battery, plus standard charger so you can reap the benefits of switching to an electric mower and save money each time you use it. Looking for that finishing touch? You can create clean, fresh and defined lines in your lawn with the rear-roller kit (AR1700 rear roller kit available to purchase separately). When you're done, the upright storage capabilities mean the mower can be tucked away neatly until the next time. With no need to store petrol, it's safer, and helps declutter sheds and garages.

Packaging Contains

2.5Ah Li-Ion Battery, Charger
